Gear of the Year  
- Outdoor Canada Magazine

## How will iSun™ create a new category of portable power products?

With innovative accessories and marketing support. For example, the iSun BattPak™: the most versatile battery charger in the world, will quick-charge up to 10 batteries and is the only charger that has AC, DC and solar charging capabilities thanks to the iSun™. The iSun BattPak™ conveniently slides under the iSun™ to provide portable power.

### Accessories Included

- Female socket adaptor cable
- Suction cups
- Power cable
- 2.5 mm male adapter
- 3.5 mm male adapter
- 5.5 x 2.5 mm female adapter
- 5.5 x 2.1 mm female adapter
- 5.0 x 2.1 mm female adapter
- 4.0 x 1.7 mm female adapter
- 3.5 x 1.4 mm female adapter

### What is iSun™?

The iSun™ is the most complete solar charger for small electronics on the market. It comes with plugging accessories that will enable you to run over 90% of all small electronics.

### What can the iSun™ run?

The iSun™ can run small electronics requiring less than 2 watts. It can help run any small electronics over 2 watts by connecting multiple iSun™ units together. Daisy-chaining the unit with another one can double the power output. "Daisy-chaining units together offers more power to end users, and a continuous stream of profits to our partners."  
- Sass Peress, CEO, ICP Global Technologies.

### Who are the target groups?

The traveler can use it to run his cell phone, PDA, small and portable computer etc. The outdoor person can use it to run a GPS, a FRS radio, a two-way radio, a cell phone, a hand-held video game, a digital camera, and a portable mp3, minidisc or CD player.

### When can I use the iSun™?

The iSun™ unit can be used in all sunny conditions. Naturally, the brightest conditions will yield better charging output.

### 2.2 watts

290 mAmps@7.6V  
145 mAmps@15.2V

### How much time is needed to charge rechargeable batteries?

The iSun™ can charge rechargeable batteries within 2 to 8 hours depending on the amount of sun exposure and on the type of rechargeable battery, which is usually between 500mA and 1500mA.

### Why should I buy from ICP Global Technologies?

ICP Global Technologies has been in the solar business for over 10 years with products that have sold over 500,000 units around the world. Not only do we manufacture reliable and renowned products, we provide award-winning customer support that differentiates us from the competition.

### The wireless phone market

- 1.3 billion cell phone users by 2005
- Over 110 million cell phone users make 120 000 emergency calls per day
